Re: Wright Construction Services, Inc.

To Whom It May Concern;

Hoener Associates, Inc., Architects has worked with Wright Construction Services, Inc., on several projects over a period of the last few years. All of the projects have been *successfully* completed for our clients.

We have worked with various personnel at Wright over the years and have found their staff to be experienced, cooperative and enjoyable to work with. They share our philosophy and goal to provide the customer with a quality project. They embrace tackling unforeseen problems during construction and have been extremely helpful in developing solutions for the benefit of the customer to solve both scheduling issues and controlling costs for unforeseen problems encountered for site development. They have access to a quality set of sub-contractors and manage the sub-contracting portion of the construction contract very well. They are helpful and cooperative regarding pricing additional work and have been one of the best general contractors we have ever worked with to meet tight schedules and addressing scheduling/weather issues when incurred during the construction phase. They have always addressed issues of quality workmanship and are responsive during the warranty period. They have also provided assistance on value engineering and conceptual cost estimating for project planning. The internal handling of contractual and construction paperwork is organized, accurate and timely.

We always invite Wright Construction to bid our projects. They have also bid projects outside of St. Louis metropolitan area providing use with additional competitive bids on our public bid K12 educational projects. We find their approach to business to be ethical and they recognize the value of producing a successful project for our shared customer.

We *strongly* recommend you consider Wright Construction Services, Inc. for appropriate projects as they are developed. Please don't hesitate to contact me if you have questions.

Sincerely,

HOENER ASSOCIATES, INC. – ARCHITECTS
