Letter of Reference: Wright Construction

To Whom It May Concern:

NGG is pleased to recommend Wright Construction as a general contractor for any major commercial project.

We have had the pleasure of working with Wright Construction here St. Louis on two recent projects, Logan College and Hazelwood East High School. We have found Wright organized, efficient, and in control of the complexities often associated with fast track construction projects.

They are also dependable team players using good judgment, a customer focused outlook and a logical and practical approach to delivering projects that meet the owner's needs.

NGG Ltd., Inc. is a minority owned full service curtain wall subcontracting company established in 1982 in St. Louis. NGG typically self performs 90% of its work. Our focus in the industry is primarily construction with custom curtain wall applications. We design, manufacture and install our own wall systems. Our scope of work includes unitized pre-glazed curtain wall, composite metal panels, stone and pre-cast panels, ceramic tile panels and customized sunshades and trims.

Over the years we have worked with many general contractors and construction managers. Because of Wright Construction's professionalism and great commitment to their clients and subcontractors they deserve serious consideration and we recommend them highly.

Sincerely,

Manuel C Silva
Chief Executive Officer
