Letter of Recommendation
Wright Construction Services, Inc.

September 24, 2015

To whom it may concern,

As President of Three Rivers Community College, I have recently had the opportunity to work closely with Wright Construction on our New Multipurpose Classroom & FEMA Safe Room Project. Throughout the course of construction, Wright and its employees displayed a high level of professionalism, experience, dedication, and commitment to quality; Wright Construction assumed ownership of our project and cultivated a teamwork oriented atmosphere.

The construction schedule was aggressive, permitting issues were realized, and weather presented inordinate challenges; however, Wright Construction exhibited a “can-do attitude” and forged ahead to complete our project on time and within budget. Throughout the project, communication remained effective and relationships with subcontractors proved strong. Changes were processed fairly without impacting the overall schedule.

Wright has employed some of the most responsible and driven members in the construction industry lending conscientious creativity to the project. I was especially impressed with the selected site superintendent, Mr. Pete Dooley, who worked consistently and diligently to provide a high quality end product. The work ethic of Wright Construction Services’ team exemplifies a willingness and ability to work with the project owner to find creative solutions to problems without unduly burdening the project.

It is my highest and most sincere recommendation that if you have a project that you wish to have delivered on time, on budget and with high quality, that you take a very close look at Wright Construction. If you should wish to discuss our project or relationship in great detail, please feel free to contact us at your convenience.

Sincerely,

Wesley A. Payne, Ph.D.
President
